ARCA STYLE QUICK RELEASE MOUNTING SYSTEM

Mounting Conversion Plate to Manfrotto MHXPRO-3WG

1

Remove Level Screw with Torx Wrench (provided). Nut on opposite side may have to be hold in place with any small object to prevent rotating

2

Remove Level and Safety stop mechanism.

3

Remove Pin from safety mechanism and save it. You will need it later in step 6.

4

Place adapter plate at top of Manfrotto head.

5

Attached adapter plate with M5 screw using opening in a Manfrotto head where level screw was located. Use provided Nut in place of original Nut removed in step 1

6

Place pin removed in step 3 in original position. We you will use it as second holding point.

7

Attach button screw. Screw will rest on the pin. Use long ball point hex L key

8

Rotate head to its original working orientation and attached arca clamp. Clamp can be mount in 4 different orientation.

9

You are now complete and can begin to use your equipment.
